

Urban Consumer Confidence Survey

Today, the Reserve Bank released the results of May 2026 round of its bi-monthly urban consumer confidence survey (UCCS)¹. The survey collects current perceptions (*vis-à-vis* a year ago) and one year ahead expectations of households on general economic situation, employment scenario, overall price situation, own income and spending. The survey was conducted during May 2-11, 2026, covering 6,086 respondents across 19 major cities.

Highlights:

- Consumer confidence for the current period declined for the third successive round with the Current Situation Index (CSI)² going down to 90.7 from 95.7 in the previous round (Chart 1).
- Confidence for the year ahead, though optimistic, also weakened from the previous round. The Future Expectations Index (FEI) dropped by 1.5 points to 118.7 which is the lowest since September 2023 (Chart 1).
- Households' current perception on economic situation also receded, registering a further decrease of 7.9 points from the previous round. The outlook also declined by 3.6 points, though remained in the optimistic zone (Table 1).
- Households' sentiment significantly weakened on spending for both the time horizon. The waning is primarily driven by ebbed sentiment on discretionary expenditure (Tables 6, 7 and 8).

Note: Please see the excel file for time series data³

¹ The survey results reflect the respondents' views, which are not necessarily shared by the Reserve Bank. Results of the previous survey round were released on the Bank's website on [April 08, 2026](#).

² CSI and FEI are compiled on the basis of net responses on the economic situation, income, spending, employment and the price level for the current period (as compared with one year ago) and a year ahead, respectively. CSI and FEI = 100 + Average of Net Responses of the above parameters.

³ Unit-level data for previous rounds of the survey are available on the Bank's 'Database on Indian Economy' (DBIE) portal (weblink: <https://data.rbi.org.in/DBIE/#/dbie/home>) under the head 'Unit-level Data'.

Summary based on Net Responses ⁴						
Main Variables	Current Perceptions			One year ahead Expectations		
	Mar-26	May-26	Change	Mar-26	May-26	Change
Economic Situation	-8.6	-16.5	↓	23.1	19.5	↓
Employment	-9.1	-14.4	↓	25.2	21.8	↓
Price Level	-85.2	-90.7	↓	-76.7	-71.5	↑
Income	3.0	0.9	↓	48.4	47.1	↓
Spending	78.4	74.0	↓	81.2	76.6	↓
Consumer Confidence Index	95.7	90.7	↓	120.2	118.7	↓
↑ Positive Sentiments with sign of improvement compared to last round				↑ Negative Sentiments with sign of improvement compared to last round		
↓ Positive Sentiments with sign of deterioration compared to last round				↓ Negative Sentiments with sign of deterioration compared to last round		
↔ Positive Sentiments with no change compared to last round				↔ Negative Sentiments with no change compared to last round		

⁴ 'Net response' is the difference between the percentage of respondents reporting optimism and those reporting pessimisms. It ranges between -100 and 100. Any value greater than zero indicates expansion/ optimism and values less than zero indicate contraction/ pessimism.

Table 1: Perceptions and Expectations on the General Economic Situation

(Percentage responses)

Survey Round	Current Perception				One year ahead Expectation
